PROFESSIONAL SUMMARY

QA Engineer with a project management foundation and over six years of combined professional experience across digital product delivery, university operations, and entrepreneurial leadership. Currently a freelance QA Engineer at Rolling Glory, executing 500+ structured test cases across 7 enterprise product cycles for enterprise clients across retail, FMCG, and pharmaceutical sectors. Built early-career project management experience managing 15+ digital projects end-to-end at the same company, then spent nearly four years strengthening documentation, stakeholder coordination, and event operations in a university research and administration role before returning to hands-on technical QA work in late 2024. Hands-on with Postman and Hopscotch for manual and API-level testing, and building test automation skills.

WORK EXPERIENCE

Quality Assurance Engineer · Rolling Glory, Bandung, Indonesia

Nov 2024 – Present

- Conduct structured functional, regression, and end-to-end testing across mobile apps, web platforms, and CMS products for enterprise clients
